Plants for Roof Garden, Balcony and Terrace Themes

For all roof garden and balcony and terrace themes we highly recommend that you use planters with integral self-watering systems or use appropriate sized irrigation tanks that can be fitted within planters of any shape and volume.

See our full range of self watering Contemporary Planters as well as our Classic and Italianate ornate ranges. We can also supply bespoke made troughs in various woods as well as produced from high gloss, satin finished, lightweight, yet resilient polycarbonate. Call us on 01752 829178 or complete a request form found at www.eastofedenplants.co.uk

Please contact us to discuss your situation or arrange a consultation site visit.
We have developed a very adaptable, lower priced, very resilient natural screening solution to most situations called para-screens.

Japanese topiary specimens
We design and create unique plantscapes in exposed or extreme urban environments, including roof gardens, roof terraces and balconies, living green walls as well as interiors.

In each case we choose from a palette of plants best suited to the conditions, selecting each plant for light, exposure and drought tolerance as needed. We combine these elements into stunning and unique living displays – plantscapes.

For a consultation please contact us on 01752 829178 or email designs@eastofedenplants.co.uk, or you can go to our website at www.eastofedenplants.co.uk and use our request form.
